

GaiaNexus

UNWIND NATURE WITH TECHNOLOGY

INNOVATION IN
Agri-
Biotechnology

GaiaNexus Pvt. Ltd. — Transforming agriculture through a scientifically designed integration of **microbial technology**, **seaweed bioactives**, and **organic nutrient management** — empowering farmers to achieve higher productivity, improved soil health, and reduced chemical dependency.

OUR METHODOLOGY

Systemic Farming Platform

MICROBIAL CONSORTIA

Beneficial microbes that restore soil life and suppress pathogens

SEAWEED BIOACTIVES

Natural bio-stimulants that boost growth and stress tolerance

ORGANIC RECYCLING

Accelerated composting for nutrient-rich organic matter

NUTRIENT MANAGEMENT

Balanced N-P-K availability for maximum uptake efficiency

- Soil fertility & microbial biodiversity
- Nutrient use efficiency

- Plant immunity & stress tolerance
- Crop yield with reduced input cost

OUR VISION

Bridging Nature & Technology

To revolutionize agriculture by bridging nature and technology, enabling farmers to produce nutrient-rich, chemical-responsible food while preserving soil ecosystems for future generations.

IMPACT DELIVERED

- Improved soil organic carbon
- Enhanced plant disease resistance
- Increased flowering & fruiting
- Sustainable, cost-effective farming

PRODUCT PORTFOLIO

Aman Series — Complete Crop Solutions

Aman BioVaccine

Plant Immunity Activator

Enhances early crop establishment and activates plant defense mechanisms.

Aman BioCocktail

Flowering & Yield Enhancer

Boosts flowering, fruit setting, and directs plant energy toward higher yield.

Aman BioCocktail Plus

Advanced Microbial Formula

Rich in beneficial microbes; prevents pathogenic infections while improving vigor.

Aman Oceanus

Root & Soil Vitalizer

Improves root growth, soil structure, and water retention using seaweed bioactives.

Aman TerraDigest

Composting Microbial Consortium

Accelerates decomposition of organic waste into nutrient-rich compost.

Aman TerraEssence

Essential Microorganism Consortium

Restores soil microbial balance and suppresses harmful pathogens effectively.

Aman TerraNPK

Nutrient Mobilizing Consortium

Enhances availability of N, P & K for efficient plant uptake from soil.

Aman Terraformer

Fermented Organic Manure (Powder)

Improves soil organic carbon and long-term fertility. Solid formulation.

TopCare & TerraBooster

Seaweed Granules & Gel

Slow-release granules for sustained growth; concentrated gel for rapid stress recovery.

WHY GAIANEXUS

Improved Soil Health & Organic Carbon

Enhanced Plant Immunity & Disease Resistance

Increased Flowering, Fruiting & Yield

Reduced Chemical Fertilizer Dependency

Sustainable & Cost-Effective Farming
